

MANAGEMENT'S DISCUSSION AND ANALYSIS FIRST QUARTER 2016

This management discussion and analysis ("MD&A") is dated May 5, 2016. It should be read in conjunction with the condensed consolidated interim financial statements and notes of Canyon Services Group Inc. ("Canyon" or the "Company") as at and for the three months ending March 31, 2016 and 2015 as well as the audited consolidated financial statements and notes as at and for the years ending December 31, 2015 and 2014. Additional information relating to the Company, including the Company's Annual Information Form ("AIF") for the year ended December 31, 2015, is available on SEDAR at www.sedar.com. All amounts are denominated in Canadian dollars unless otherwise identified.

We refer you to the end of the MD&A for our Risk Factors and Non-GAAP Measures. We also note that this MD&A contains forward-looking information and statements. Our disclaimer on forward-looking information and statements is described at the end of this MD&A.

CORPORATE OVERVIEW

Canyon is an oilfield services company that focuses operations in the Western Canadian Sedimentary Basin ("WCSB") with two core business lines: Pressure Pumping Services and Fluid Management Services. Canyon provides Pressure Pumping Services while Canyon's wholly owned subsidiary, Fraction Energy Services Ltd. ("Fraction"), provides Fluid Management Services.

| 000's except per share, job amounts and hydraulic pumping capacity (Unaudited) | Three Months Ended | |
|---|--------------------|-----------|
| | March 31, | |
| | 2016 | 2015 |

Note (2): Includes all jobs from each service line within Pressure Pumping Services, specifically hydraulic fracturing; coiled tubing; nitrogen fracturing; acidizing and cementing.

FINANCIAL AND OPERATING HIGHLIGHTS

First Quarter Industry Conditions

First quarter of 2016 saw continued weakness in energy services. Activity across the WCSB declined by 42% from first quarter 2015 (*source: Nickles Energy Group*) in response to persistently low commodity prices. Global concerns around oil supply and economic growth together with record global inventory levels have resulted in West Texas Intermediate (WTI) oil prices for Q1 2016 declining by 31% over Q1 2015 (*source: US Energy Information Administration*). Similarly, in the case of natural gas, AECO spot prices for Q1 2016 declined by 34% relative to Q1 2015 (*source: Nickles Energy Group*) in response to strong U.S. production levels, sluggish demand due to mild winter conditions and high inventory levels. In response to the lower commodity pricing environment, exploration and production (E&P) companies have reduced capital programs leading to dramatic declines in drilling rig utilization, well licensing and well completions, all of which are key drivers of industry activity across the WCSB. In Q1 2016, WCSB drilling rig utilization averaged 23%, a reduction of 40% from Q1 2015 levels (*source: Nickles Energy Group*). Similarly, well licenses and completions decreased by 46% and 63%, respectively, in the first quarter 2016 compared to the first quarter 2015 (*source: Nickles Energy Group*).

First quarter 2016 Pressure Pumping Services and Fluid Management Services pricing declined by roughly 10% to 15% from the already low levels experienced in Q4 2015, primarily driven by lower industry activity levels.

The above *Industry Conditions* are referred to throughout this MD&A.

Overall Performance and Results of Operations

The aforementioned *Industry Conditions* were the primary factor in declines of the Company's first quarter financial results when compared to Q1 2015. First Quarter 2016 consolidated adjusted EBITDA includes one-time charges for commodity tax assessments, doubtful accounts provision, and severances of \$1.7 million. In Q1 2016, consolidated revenues totaled \$71.3 million, down 54% from \$155.6 million in Q1 2015 when industry activity and pricing were considerably higher.

The *Industry Conditions* were the primary driver leading to Q1 2016 consolidated adjusted EBITDA of negative \$3.7 million compared to a positive \$18.3 million in Q1 2015. The decrease in consolidated adjusted EBITDA from Q1 2015 is due to the volatile operating leverage that is characteristic of the pressure pumping industry. The Company was able to minimize negative adjusted EBITDA, in part, due to the shift of a majority of its workforce to variable pay combined with significant cost reduction measures (see *Cost Reduction Measures* for further details).

The first quarter consolidated loss and comprehensive loss of \$20.6 million (Q1 2015: loss \$1 million) was a result of *Industry Conditions*.

Overview of Pressure Pumping Services

In Pressure Pumping Services, *Industry Conditions* led to lower activity and rapidly deteriorating customer pricing levels. This has resulted in current pricing levels approximately 40% lower than those prevailing at the beginning of 2015.

In the first quarter of 2016, drilling activity was down approximately 40% over Q1 2015 while completions activity was down approximately 63% over Q1 2015 as certain E&P companies deferred completion expenditures due to weak commodity prices. Although activity was significantly down in the WCSB from last year, Pressure Pumping Services were able to remain relatively active throughout the quarter. Canyon's Pressure Pumping Services job count in Q1 2016 increased by 7% to 664 jobs from 620 in Q1 2015. Cementing jobs completed increased by 142% over Q1 2015 due to the addition of contract-based work, while hydraulic fracturing jobs completed declined by 13% over the same period. In the current quarter, average hydraulic fracturing revenue per job decreased 49% to \$134,015 in Q1 2016 from \$261,973 in Q1 2015 due primarily to the aforementioned pricing declines. This pricing degradation was the main driver in overall Pressure Pumping Services revenues declining by 54% when compared to Q1 2015.

The general trend in well completions design has resulted in increased fracturing intensity on a per well basis in the form of more fractures per wellbore and/or larger individual fracture designs. One of the main predictors of fracture intensity for pressure pumping is the average total length in meters per well. Meters drilled per well has increased by about 36% from Q1 2015 (*source: Nickles Energy Group*), while total meters drilled has decreased by about 52% due to the sharp decrease in WCSB activity. The service intensity per well, indicated by the increases in meters drilled per

well, combined with the increased proppant volumes and the usage of more expensive types of proppant, has only partially offset the activity and pricing declines seen in the first quarter of 2016.

Pressure Pumping Services cash flow and profitability remains highly levered to changes in customer pricing due to the service intensive nature of the business. Throughout 2015 and into 2016, Canyon has been working with suppliers, as well as continuing to review our internal operations and systems to reduce both variable and fixed input costs. These include: 1) proppants and chemicals; 2) third-party hauling and fuel; and 3) labour, benefits and accommodations. The goal of these reductions is to permanently reduce our input costs of delivering services to our customers (see *Cost Reduction Measures* below for further details). These cost reduction efforts have not been significant enough to offset the dramatic reduction in Pressure Pumping Services' pricing. As a result, Pressure Pumping Services adjusted EBITDA in Q1 2016 turned to a negative of \$3.8 million, which was down significantly from the comparable Q1 2015 adjusted EBITDA of positive \$13.8 million. First quarter 2016 results include one-time charges for prior period commodity taxes, doubtful accounts provision, and severance of \$1.6 million.

Overview of Fluid Management Services

Fraction is a provider of fracturing fluid logistics, containment, transfer and storage for the oil and gas industry in Northwest Alberta and Northeast British Columbia and operates as an independent operating segment. Fraction's service offering complements Canyon's offering of services to our customers.

As a result of the *Industry Conditions*, prices have declined by approximately 35% for water transfer services, and up to 70% for containment services, when compared to peak 2014 pricing levels. For the three months ended March 31, 2016 Fraction contributed \$8.3 million in revenue and \$0.9 million in adjusted EBITDA compared to \$17.4 million in revenue and \$5.5 million in adjusted EBITDA in Q1 2015. First quarter 2016 results include one-time charges for severance of \$0.1 million.

Industry Conditions contributed to reduced Q1 2016 revenues and profitability when compared to Q1 2015. While tank rentals, fluid containment and fluid transfer services are still required for completions, the volume of work has decreased and there is continued pressure on pricing due to strong competition. The decline in volume of work is evidenced by a decline in tank rental utilization rates to 36% in Q1 2016 from 58% in Q1 2015.

Cost Reduction Measures

To mitigate the significant decreases in services' pricing, the Company has been working diligently to reduce all operating and input costs, primarily focused on: chemicals; proppants; fuel; third party hauling; accommodations; and labour. Canyon does not view the reduction of input costs as a one-time exercise and is continuing to work with suppliers and customers to gain concessions and economies of scale. More importantly, we have made and will continue to make changes to permanently reorganize and transform certain business processes with the goal of permanently reducing the cost of delivering our services.

Canyon's Variable Pay Structure

Canyon's Pressure Pumping Services division has moved away from a fixed cost model to a variable pay model so that expenses are more closely linked to revenue. The pressure pumping industry has historically experienced significant volatility of cash flows due to the fact that many field employees received fixed base salaries. This previous lack of flexibility within the Pressure Pumping Services division's cost structure magnified cash flow losses during low activity periods. Canyon's move to a variable cost structure should aid in reducing cash flow volatility during periods of low activity levels. Effective August 1, 2015, Canyon introduced an hourly rate for the transportation group to more closely match the compensation structure of the trucking industry. Effective November 1, 2015, Canyon introduced a day rate for the majority of the field staff in its pressure pumping business and made further changes to a day rate model effective January 1, 2016. These changes now place approximately 75% of the Company's consolidated workforce on a variable pay structure compared to about 10% at the beginning of the first quarter of 2015.

Other Input Costs

First quarter 2016 chemical costs have been reduced by approximately 24%, and third party hauling rates have decreased by approximately 10%, relative to first quarter 2015. Although trucking rates have declined from 2015 levels, Canyon has taken positive strides in decreasing third party hauling costs by migrating the majority of trucking to an internal cost rather than a third party cost. The cost of both Canadian and U.S. sourced proppants has been reduced by approximately 25% net of exchange rate fluctuations. Minor concessions have been received from fuel suppliers in addition to the benefits of lower oil prices and accommodation costs have been reduced by about 15%.

During Q1 2016, Canyon reduced its permanent employee count in the Pressure Pumping Services and Fluid Management Services divisions by 10% and 21%, respectively, to better match reduced activity levels. The reduced work force resulted in one time severance costs of \$1.5 million for the 2015 year and \$0.3 million in Q1 2016. During the first quarter of 2015, employees' salaries were rolled back between 5% and 10%, with a 10% reduction of executive management salaries and directors' fees. Various employee benefits were also reduced or suspended.

Dividend

The Board of Directors (the "Board") continuously reviews the long-term capital structure of the Company and its corresponding dividend policy each fiscal quarter. On March 3, 2016, the Company announced the suspension of its quarterly dividend. At the date of this MD&A, there is currently no plan to reinstate a dividend until *Industry Conditions* improve.

Key Events

Some of the key strategic events for the three months ended March 31, 2016 and to the date of this MD&A are as follows:

- Canyon remained active in Q1 2016 with total jobs completed increasing by 7% to 664 from 620 jobs completed in Q1 2015. Cementing jobs completed increased by 142% over Q1 2015 as Canyon secured contract-based work, while hydraulic fracturing jobs completed declined by 13% over the same period. For Q1 2016, the hydraulic fracturing job count of 420 remained steady when compared to the previous quarter of 418 jobs completed in Q4 2015.
- Canyon's active quarter combined with significant cost reduction measures implemented over the past year was insufficient to offset the dramatically lower pricing which has declined 10-15% from Q4 2015 levels and 40% from peak 2014 levels.
- *Industry Conditions* resulted in Q1 2016 consolidated revenues of \$71.3 million compared to \$155.6 million in Q1 2015 and negative consolidated adjusted EBITDA of \$3.7 million in the current quarter compared to \$18.3 million in Q1 2015.
- On March 29, 2016, Canyon closed a bought deal offering of common shares (the "Offering"). Pursuant to the Offering, Canyon issued 15,812,500 common shares (including 2,062,500 common shares issued pursuant to the exercise in full of the over-allotment option granted to the underwriters) at a price of \$4.00 per common share, for total gross proceeds of \$63.25 million (proceeds net of transaction costs: \$59.7 million). The net proceeds were initially allocated to repay bank indebtedness to maintain our financial flexibility in order to fund growth opportunities when they arise.
- On January 1, 2016 Canyon transitioned additional staff to a variable pay structure, placing approximately 75% of the Company's consolidated workforce on either hourly or daily pay rates.
- On March 3, 2016, Canyon announced the suspension of the remaining \$0.03 per common share per quarter dividend preserving annual cash outflows of \$10.3 million. The Board will continue to regularly review the ability of the Company to reinstate a dividend payment policy in the context of the market for Canyon's services.
- As at March 31, 2016, Canyon has nil amounts drawn under its amended facility and has \$100.0 million available, which excludes amounts that may be available from the accordion feature of \$50.0 million.

INDUSTRY COMMENTARY & 2016 OUTLOOK

Industry Commentary

The deterioration of oil and natural gas prices since mid-2014 has significantly altered industry expectations of activity levels and job pricing for the remainder of 2016. E&P Companies are continually adjusting to the volatile and lower commodity prices by reducing or deferring drilling and completions' activities. In addition, the reduced levels of activity have pushed pricing in 2016 to levels that are unsustainable, resulting in negative EBITDA margins in the current quarter.

Another layer of uncertainty involves the delayed Liquefied Natural Gas ("LNG") development on the west coast of British Columbia. The decrease in commodity prices has affected LNG-driven activity levels and ultimately the timing of final investment decisions. While numerous projects have been proposed, representing approximately 15–20 billion cubic feet per day in combined export capacity (*source*: Canadian Association of Petroleum Producers), the timing of development has yet to be determined. Project approvals were granted in 2013 and front-end engineering was initiated

for some projects, but the decline in commodity prices combined with reduced global economic growth rates and subsequent additional regulatory hurdles are having a negative impact on Canadian LNG development. Currently, it is difficult to anticipate the timing of a positive final investment decision on any of the proposed projects.

Canyon Commentary

While Canyon has reduced costs over the past several quarters to respond to decreased WCSB activity and customer pricing levels, the impact of lower customer pricing in Q1 2016 has more than offset benefits gained from our *Cost Reduction Measures*. This pricing degradation has directly impacted the bottom line as margins have been eroded in comparison to 2015, resulting in a negative adjusted EBITDA of \$3.7 million for the Q1 2016. Even with further cost reduction measures, it will be difficult for Canyon to return to positive adjusted EBITDA in the next few quarters at existing prices and activity levels. The impact of negative adjusted EBITDA would have been much worse had we not been proactive in reducing our cost structure and taking an industry leading position in adjusting to a more variable operating cost structure.

Although we have virtually no debt and have made significant progress in implementing a more flexible and lower cost structure, we are not immune to the most dramatic decline in drilling and completions activity this industry has experienced in decades. As a result, we expect overall 2016 activity and financial results to trail 2015's already depressed levels. However, we believe financial losses of the magnitude experienced in Q1 2016 are ultimately not viable for the long-term sustainability of the pressure pumping industry as a whole. Additionally, we believe Canyon is better positioned than our competitors, both technically and operationally, to navigate the expected near term financial losses and improve the long term sustainability of our business due to our strong financial position and variable cost structure.

We are working closely with our customers to increase efficiencies in all of our service offerings, with specific focus on our pad-based 24 hour projects which offer the most cost savings to our customers. Canyon continues to look at ways of providing more efficient operations for our customers, including utilizing our Fluid Management Services division to bundle fracturing and fluid services for the customer, thereby avoiding well completion delays and providing more efficient operations for the customer.

Primary Objectives

As a result of our relatively strong financial position, and our reduced and adjusted cost structure, Canyon's short-term and long-term objectives remain essentially unchanged for 2016. In the short-term, our primary objective is to maintain and selectively grow our market share, which has and will continue to negatively impact short-term return on invested capital. Our primary long-term objectives are as follows:

- To build a leading Canadian service provider that can succeed and grow over the long-term and provide superior long-term returns on invested capital to our investors by reducing finding and development costs for our customers.
- To grow Canyon's operating assets over the next five years, with a focus on servicing the WCSB.

To achieve our objectives, Canyon will continue to undertake the following key activities:

- Seek out attractive investment opportunities, including actively evaluating oilfield acquisition opportunities that will add both long-term value on a per share basis and enhance our relative competitive position with customers; and
- Strengthen relationships with top-tier customers and build our reputation in the region's premier unconventional plays with a particular focus on high-rate treatments.

FINANCIAL REVIEW – FIRST QUARTER 2016 COMPARED TO 2015

Pressure Pumping Services - Q1 Financial Review

| 000's (Unaudited) | Three Months Ended March 31, | | | | |
|--|------------------------------|--------------------------|----------------------|-----------|--------------------------|
| | 2016 | | | 2015 | |
| | Total | Percentage of revenue | Percentage change | Total | Percentage of revenue |
| Revenue | \$62,978 | | (54%) | \$138,182 | |
| Depreciation - cost of services | (10,717) | (17%) | (11%) | (12,083) | (9%) |
| Other - cost of services | (63,399) | (101%) | (47%) | (119,967) | (87%) |
| Cost of services | (74,116) | (118%) | (44%) | (132,050) | (96%) |
| Gross (loss) profit | (11,138) | (18%) | (282%) | 6,132 | 4% |
| Depreciation - administrative expenses | (539) | (1%) | 2% | (529) | -% |
| Other - administrative expenses | (3,371) | (5%) | (23%) | (4,403) | (3%) |
| Administrative expenses | (3,910) | (6%) | (21%) | (4,932) | (3%) |
| Amortization expense | (5) | -% | -% | (5) | -% |
| Results from operating activities | (15,053) | (24%) | (1,360%) | 1,195 | 1% |
| Add non-cash items: | | | | | |
| Depreciation and amortization | 11,261 | 18% | (11%) | 12,617 | 9% |
| Adjusted EBITDA ⁽¹⁾ | (\$3,792) | (6%) | (127%) | \$13,812 | 10% |

Note (1): See *Non-GAAP Measures*.

Revenues

In Q1 2016, Canyon completed 664 pressure pumping jobs, a 7% increase over the 620 jobs completed in Q1 2015 despite industry activity levels that were approximately one-half of prior year's levels. In the current quarter, lower-revenue cementing jobs completed increased by 142% over Q1 2015 due to the addition of contract work, while higher-revenue hydraulic fracturing jobs completed declined by 13% over the same periods due to *Industry Conditions*. Commodity prices remained low throughout the quarter which, coupled with reduced industry activity, has led to sharply lower customer pricing. As a result, Pressure Pumping Services revenue decreased by 54% to \$63.0 million from \$138.2 million in Q1 2015.

Cost of services

Cost of services includes materials, products, transportation and repair costs, employee benefits expense and depreciation of property and equipment. The following table provides a summary of cost of services:

| 000's (Unaudited) | Three Months Ended March 31, | | |
|--|------------------------------|----------------------|-----------|
| | 2016 | Percentage change | 2015 |
| Employee benefits expense | \$18,231 | (39%) | \$30,027 |
| Depreciation of property and equipment | 10,717 | (11%) | 12,083 |
| Materials and inventory | 33,619 | (50%) | 67,679 |
| Operating expense | 11,549 | (48%) | 22,261 |
| Total cost of services | \$74,116 | (44%) | \$132,050 |

- Total costs of services did not decline in proportion to revenue declines as supplier discounts were not in proportion to services revenue pricing decreases. Additionally, certain of the input costs purchased in United States dollars (USD) were negatively affected by the appreciation in USD relative to the Canadian dollar.
- Employee benefits expense decreased by 39% in Q1 2016 when compared to Q1 2015 due to reduced activity levels, as well as a reduction in the permanent employee count. Severance costs were \$208 during Q1 2016.

While the Company implemented wage rate reductions in response to *Industry Conditions*, pricing for services deteriorated more than the wage rate reductions.

- Depreciation of property and equipment decreased 11% when compared to Q1 2015, due primarily to the change in expected useful life calculation of coiled tubing, nitrogen and cementing equipment that occurred in Q2 2015.
- Materials, products, transportation and other operating expenses decreased dramatically in Q1 2016 when compared to Q1 2015 due to lower activity and previously noted *Cost Reduction Measures*. Included in Q1 2016 operating expense is a commodity tax provision of \$0.8 million resulting from ongoing assessments.

Administrative expenses (G&A)

The following table provides a summary of G&A:

| 000's (Unaudited) | Three Months Ended March 31, | | |
|--|------------------------------|-------------------|----------------|
| | 2016 | Percentage change | 2015 |
| Employee benefits expense | \$2,094 | (35%) | \$3,242 |
| Depreciation of property and equipment | 539 | 2% | 529 |
| Other administration expenses | 1,277 | 10% | 1,161 |
| Total administrative expenses | \$3,910 | (21%) | \$4,932 |

Overall, G&A decreased by 21% mainly due to lower employee benefits expense attributable to the wage rate, benefits and staffing reductions implemented at the end of Q1 2015 and in Q1 2016 as previously discussed in *Cost Reduction Measures*.

Adjusted EBITDA

In Q1 2016, adjusted EBITDA for Pressure Pumping Services decreased to a negative \$3.8 million from a positive \$13.8 million in Q1 2015. The primary cause of the decline was *Industry Conditions* that resulted in reduced activity and customer pricing.

Fluid Management Services – Q1 Financial Review

| 000's (Unaudited) | Three Months Ended March 31, | | | | |
|--------------------------------------|------------------------------|-----------------------|-------------------|----------------|-----------------------|
| | 2016 | | | 2015 | |
| | Total | Percentage of revenue | Percentage change | Total | Percentage of revenue |
| Revenue | \$8,291 | | (52%) | \$17,403 | |
| Depreciation - cost of services | (2,411) | (29%) | 40% | (1,719) | (10%) |
| Other - cost of services | (5,987) | (72%) | (42%) | (10,266) | (59%) |
| Cost of services | (8,398) | (101%) | (30%) | (11,985) | (69%) |
| Gross (loss) profit | (107) | (1%) | (102%) | 5,418 | 31% |
| Other - administrative expenses | (1,446) | (17%) | (11%) | (1,624) | (9%) |
| Administrative expenses | (1,446) | (17%) | (11%) | (1,624) | (9%) |
| Amortization expense | (1,442) | (17%) | (4%) | (1,500) | (9%) |
| Results from operating activities | (2,995) | (36%) | (231%) | 2,294 | 13% |
| Add non-cash items: | | | | | |
| Depreciation and amortization | 3,853 | 46% | 20% | 3,219 | 19% |
| Adjusted EBITDA⁽¹⁾ | \$858 | 10% | (84%) | \$5,513 | 32% |

Note (1): See *Non-GAAP Measures*.

Revenues

The Fluid Management Services division, contributed \$8.3 million of revenue to Canyon in Q1 2016, a 52% decrease from the \$17.4 million generated in Q1 2015. *Industry Conditions* caused increased competitive pressures from

smaller service providers which led to pricing declines of 15% to 30% for water transfer services and significantly higher pricing declines for containment services relative to Q1 2015.

Cost of services

The following table provides a summary of cost of services:

| 000's (Unaudited) | Three Months Ended March 31, | | |
|--|------------------------------|----------------------|-----------------|
| | 2016 | Percentage change | 2015 |
| Employee benefits expense | \$2,650 | (41%) | \$4,501 |
| Depreciation of property and equipment | 2,411 | 40% | 1,719 |
| Materials and inventory | 841 | (19%) | 1,044 |
| Operating expense | 2,496 | (47%) | 4,721 |
| Total cost of services | \$8,398 | (30%) | \$11,985 |

- Employee benefits expense decreased by 41% in Q1 2016 due to a reduction in wage rates as well as a decrease in staffing to match reduced industry activity levels.
- Materials, products, transportation and repair costs decreased dramatically in Q1 2016 when compared to Q1 2015, mainly due to lower activity. Although discounts for costs were negotiated, the costs did not decrease in proportion to revenue as competitive pressures resulted in price decreases which were greater than input cost decreases.
- Depreciation of property and equipment expense increased by 40% in Q1 2016 primarily due to the acquisition of a fluid hauling business in Q3 2015.

Administrative expenses (G&A)

The following table provides a summary of G&A:

| 000's (Unaudited) | Three Months Ended March 31, | | |
|--------------------------------------|------------------------------|----------------------|----------------|
| | 2016 | Percentage change | 2015 |
| Employee benefits expense | \$811 | 4% | \$779 |
| Other administration expenses | 635 | (25%) | 845 |
| Total administrative expenses | \$1,446 | (11%) | \$1,624 |

Employee benefits expense did not decrease primarily as a result of one-time severance costs. Overall, G&A decreased as a result of continued cost reduction measures.

Adjusted EBITDA

Q1 2016 adjusted EBITDA totaled \$0.9 million, or 10% of revenues, a decrease of 84% from \$5.5 million in Q1 2015, primarily due to the aforementioned lower activity and reduced customer pricing.

Corporate – Q1 Financial Review

This segment consists of costs incurred to operate a public company, including corporate management, head office costs, share-based payment expenses and professional fees.

| 000's (Unaudited) | Three Months Ended March 31, | | |
|--|------------------------------|-------------------|---------|
| | 2016 | | 2015 |
| | Total | Percentage change | Total |
| Revenue | \$- | | \$- |
| Share-based payment transactions - administrative expenses | (4,860) | 254% | (1,371) |
| Other - administrative expenses | (739) | (25%) | (990) |
| Results from operating activities | (5,599) | 137% | (2,361) |
| Add non-cash items: | | | |
| Share-based payments expense | 4,860 | 254% | 1,371 |
| Adjusted EBITDA ⁽¹⁾ | (\$739) | (25%) | (\$990) |

Note (1): See *Non-GAAP Measures*.

Administrative expenses for the three months ended March 31, 2016 totaled \$5.6 million (2015: \$2.4 million) and includes employee benefits expense, share-based payments, and other head office administrative expenses. The change is due to an increase in non-cash share-based payments expense as a result of annual bonus awards being settled with non-cash share-based payments rather than cash bonuses.

Other Items – Quarterly Consolidated Statement of Operations

| 000's (Unaudited) | Three Months Ended March 31, | |
|-------------------------------|------------------------------|---------|
| | 2016 | 2015 |
| Finance costs | \$589 | \$533 |
| Foreign exchange loss | \$565 | \$1,564 |
| Income tax expense (recovery) | (\$5,227) | \$20 |

Finance costs

Finance costs include interest on bank indebtedness and finance lease obligations and totaled \$0.6 million in Q1 2016, which approximated the 2015 figure of \$0.5 million. Finance costs include interest on loans, finance lease obligations and automobile loans.

Foreign exchange loss

In Q1 2016, the Company recorded a foreign exchange loss of \$0.6 million (2015: loss of \$1.6 million). The Company purchases U.S. sourced proppants which require payment in USD. Payments are 30 to 45 days after purchase which cause foreign exchange gains and losses on outstanding USD accounts payable. In addition, included within foreign exchange gain (loss) are amounts related to the Company's hedging activities. The decrease in foreign exchange loss in Q1 2016 over Q1 2015 is due to the fact the USD depreciated against the Canadian dollar from Q4 2015 to the end of Q1 2016.

Income tax expense

For Q1 2016, the actual calculated tax rate did not equal the expected combined income tax rate of 27% primarily due to income before income tax including expenses that are not deductible for tax purposes, including non-deductible share-based payment expenses.

SUMMARY OF QUARTERLY RESULTS ⁽¹⁾

| | | 000's except per share amounts (Unaudited) | | | | |
|---------------------|----|---|-----------------------------------|---|-------------------------------------|---------------------------------------|
| | | Revenue | Adjusted EBITDA ⁽²⁾ | Income (Loss) and Comprehensive Income (Loss) | Basic Income (Loss) per Share | Diluted Income (Loss) per Share |
| 2016 ⁽¹⁾ | Q1 | \$71,269 | (\$3,673) | (\$20,594) | (\$0.29) | (\$0.29) |
| 2015 ⁽¹⁾ | Q4 | \$93,940 | \$7,667 | (\$18,261) | (\$0.26) | (\$0.26) |
| | Q3 | \$111,314 | \$15,082 | (\$20,863) | (\$0.30) | (\$0.30) |
| | Q2 | \$43,159 | (\$9,754) | (\$21,857) | (\$0.32) | (\$0.32) |
| | Q1 | \$155,585 | \$18,335 | (\$1,038) | (\$0.02) | (\$0.02) |
| 2014 ⁽¹⁾ | Q4 | \$188,265 | \$45,576 | \$22,280 | \$0.32 | \$0.32 |
| | Q3 | \$204,309 | \$57,656 | \$30,601 | \$0.45 | \$0.44 |
| | Q2 | \$60,253 | (\$9,186) | (\$15,263) | (\$0.23) | (\$0.23) |
| | Q1 | \$138,195 | \$27,432 | \$11,850 | \$0.19 | \$0.19 |

Note (1): The Company's business is seasonal in nature with the periods of greatest activity being in the first, third and fourth quarters.

Note (2): See *Non-GAAP Measures*.

In Q2 2015 and Q2 2014, the lower revenues, negative adjusted EBITDA and loss and comprehensive loss were negatively impacted by the seasonal weather related drilling delays caused by the annual spring break-up. Since Q1 2015, *Industry Conditions* have caused a general negative trend in sequential quarterly financial results which also include goodwill impairments in Q3 2015 and Q4 2015.

Strong Q3 and Q4 2014 revenue, adjusted EBITDA, and income and comprehensive income were the result of the Company's equipment fleet essentially being fully utilized and the inclusion of Fraction's financial results commencing at the time of its acquisition in Q3 2014.

LIQUIDITY AND CAPITAL RESOURCES

Funds from operations

Funds from operations totaled \$0.4 million for the three months ended March 31, 2016, down from funds from operation of \$15.6 million in the prior year's comparable quarter. The decrease in funds from operations is due to *Industry Conditions* as previously described. Funds from operations were primarily financed by changes in working capital and through *Financing* activities, described below.

Financing

Equity (Share amounts in thousands)

During Q1, 2016, the Company issued 15.8 million common shares at \$4.00 per common for gross proceeds of \$63.3 million (\$59.7 million net of share issue costs). For Q1 2016, there were no common shares issued by the Company to employees and officers upon exercise of options pursuant to the Share Purchase Option Plan and there were 824 common shares issued for nil proceeds pursuant to the Stock-Based Compensation Plan.

Debt

As a result of the Offering, the Company had no bank indebtedness outstanding at March 31, 2016 and net cash was \$2.3 million (December 31, 2015 bank indebtedness net of cash: \$56.9 million). In addition, finance leases as at March 31, 2016 totaled \$7.6 million (December 31, 2015: \$8.7 million).

The principal amount of the amended facility totals \$100 million with an accordion feature that allows for the expansion of the amended facility by up to an aggregate maximum principal amount of \$50 million. The accordion feature is available upon request by Canyon, subject to review and unanimous approval by the lenders. The amended facility has a term of three years, extendible annually, and bears interest at variable rates depending on certain financial ratios and metrics. See *Capital Management* for further discussion of the amended facility financial covenant requirements.

Working Capital and Cash Requirements

As at March 31, 2016, Canyon had a working capital balance of \$26.0 million compared to \$27.6 million as at December 31, 2015. As at March 31, 2016 trade and other receivables decreased to \$37.2 million from \$59.1 million as at December 31, 2015 due to lower activity levels as described in *Industry Conditions*. Inventories decreased by \$4.1 million mainly due to lower chemical and proppant levels required for decreased activity levels. The Company's working capital position and available operating credit facilities exceed the level required to manage timing differences between cash collections and cash payments.

The Company continually monitors individual customer trade receivables, taking into account numerous factors including industry conditions, payment history and financial condition in assessing credit risk. The Company establishes an allowance for doubtful accounts for specifically identified customer balances which are assessed to have credit risk exposure and also a general provision for financial credit risk. As at March 31, 2016, accounts receivable includes an allowance of \$0.7 million for doubtful receivables (December 31, 2015: \$0.1 million).

Investments

For the three months ended March 31, 2016, capital expenditures, net of finance leases and assets purchased through business combinations, totaled \$1.3 million including maintenance capital, storage, transportation and water transfer equipment. Please refer to *Capital Expenditures* below.

Capital Management

The Company's objective when managing its capital structure is to maintain a balance between debt and equity capitalization so as to withstand industry and seasonal volatility, maintain investor, creditor and market confidence and to sustain future development of the business. Debt includes the current and long-term portions of bank indebtedness less cash. Capitalization is calculated as the debt, as described above, plus shareholders' equity.

The Company also manages its capital structure to maintain compliance with the financial covenants on its amended facility.

The Company is required to maintain certain financial covenants, including a debt to tangible capitalization ratio and debt service coverage ratio. Each of the Company's covenants are described in note 9 of the Company's March 31, 2016 Interim Financial Statements.

As of March 31, 2016, Canyon is in compliance with each of the financial covenants and has \$nil drawn on its amended facility (see *Financing* above). The Company may be required to adjust its capital structure from time to time as a result of expansion activities or *Industry Conditions*.

The Company believes that it has access to sufficient capital through cash on hand, internally generated funds from operations and available credit facilities to meet its obligations associated with financial liabilities and capital expenditures.

Liquidity Risk

Liquidity risk is the risk that the Company will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The Company's approach to managing liquidity is to ensure, where possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Company's reputation.

The following table of financial obligations shows the timing of cash outflows relative to trade and other payables, bank indebtedness, finance leases and operating and office leases as at March 31, 2016:

| 000's (Unaudited) | Total | Next 12 months | 1-3 years | 4-5 years | After 5 years |
|--------------------------------------|-----------------|-------------------|----------------|--------------|------------------|
| Trade and other payables | \$39,621 | \$39,621 | - | - | - |
| Finance leases | 7,634 | 2,565 | 5,069 | - | - |
| Operating and office space leases | 5,522 | 2,261 | 2,867 | 394 | - |
| Capital expenditure commitments | 250 | 250 | - | - | - |
| Total contractual obligations | \$53,027 | \$44,697 | \$7,936 | \$394 | \$- |

The Company monitors cash flow requirements and optimizes its cash return on investments. Typically, the Company ensures that it has sufficient cash on demand to meet expected operating expenses for a period of 60 days, including the servicing of financial obligations. The Company's ability to meet its obligations could be adversely affected by sustained current *Industry Conditions*, which cannot reasonably be predicted.

Capital Expenditures

Capital expenditure commitments will be funded from cash available, funds from operations and if required, available debt facilities. Please see *Working Capital and Cash Requirements, and Capital Management*.

Given the current *Industry Conditions*, the Company will look to minimize 2016 capital expenditures to required maintenance capital and modest customer requests that will generate additional funds from operations. Therefore, Canyon's total remaining capital expenditures for 2016, other than capital expenditures through business combinations, are anticipated to be \$10.7 million. Canyon will continue to monitor and may adjust its capital expenditures if industry activity levels become more certain.

Outstanding Share, Option and Incentive Based Unit Data

The following table summarizes Canyon's capitalization as follows:

| 000's (Unaudited) | May 5, 2016 | March 31, 2016 | December 31, 2015 |
|-----------------------|-------------|----------------|-------------------|
| Common Shares | 85,870 | 85,761 | 69,124 |
| Options | 1,497 | 1,572 | 3,203 |
| Incentive Based Units | 2,356 | 2,525 | 1,240 |

Share options and incentive based units granted, exercised, cancelled, expired and forfeited for the three months ended March 31, 2016 are summarized as follows:

| 000's except per share amounts (Unaudited) | Three Months Ended March 31, | |
|---|------------------------------|-------|
| | 2016 | 2015 |
| Share Options Granted | 36 | 1,033 |
| Share Options Exercised | - | 219 |
| Share Options Cancelled | 1,347 | - |
| Share Options Forfeited | 182 | 46 |
| Share Options Expired | 138 | - |
| Incentive Based Units Granted | 2,132 | 886 |
| Incentive Based Units Exercised | 824 | 28 |
| Incentive Based Units Forfeited | 23 | 5 |

The average exercise price of the options granted for the period ended March 31, 2016 was \$3.20 per option (2015: \$7.15). Please refer to *Financing*.

FINANCIAL INSTRUMENTS

Fair Values

The carrying values of cash and cash equivalents, trade and other receivables, trade and other payables, and accrued liabilities approximate their fair value due to the relatively short periods to maturity of the instruments. Loans and borrowings utilize a combination of short term fixed rates through the use of 30 to 90 day Banker's Acceptance and floating rates and accordingly, its fair market value approximates its carrying value.

Interest Rate Risk

Loans and borrowings comprise amounts drawn on the Company's bank credit facilities and finance leases for equipment and automobiles. The Company manages its interest rate risk on bank credit facilities by utilizing a combination of short-term fixed rates through the use of 30 to 90 day Banker's Acceptance rates and floating rates. The finance leases for equipment and automobiles are at fixed interest rates.

Foreign Currency Risk

The Company is exposed to currency risk on purchases that are denominated in United States Dollars (USD). At March 31, 2016 and December 31, 2015, the exposure to USD was primarily as a result of USD denominated accounts payable of USD\$3.2 million and USD\$8.6 million, respectively.

To manage the currency risk on outstanding USD accounts payable balances and on anticipated USD purchases, the Company entered into derivative contracts. At March 31, 2016, the following contract was outstanding:

| Notional Quantity (USD) | Floor (CAD:USD) | Cap (CAD:USD) | Time to expiry |
|-------------------------|-----------------|---------------|----------------|
| Collar: 2,500 | 1.4225 | 1.52 | May 16, 2016 |

The Company may choose to unwind the derivative instruments in advance of the expiry date to more closely align actual timing of physical payment of the USD accounts payable and anticipated USD purchases.

Off-Balance Sheet Arrangements

The Company has no off-balance sheet arrangements as at March 31, 2016, other than the operating leases described above under *Contractual Obligations*.

ACCOUNTING POLICIES AND ESTIMATES

The Company's International Financial Reporting Standards ("IFRS") accounting policies are provided in Note 3 to the Annual Consolidated Financial Statements as at and for the years ended December 31, 2015 and 2014. Future accounting pronouncements are provided at note 2(b) to the Consolidated Financial Statements as at and for the years ended December 31, 2015 and 2014.

Critical Accounting Estimates and Judgments

In the preparation of the Company's Consolidated Financial Statements, management has made estimates that affect the recorded amounts of certain assets, liabilities, revenues and expenses. Actual results could differ from these estimates. Estimates and judgments used are based on management's experience and the assumptions used are believed to be reasonable given the circumstances that exist at the time the Consolidated Financial Statements are prepared. Please refer to the note 3 to the Consolidated Financial Statements for the years ended December 31, 2015 and 2014 for a description of the accounting policies of the Company. The Company considers the following to be the significant accounting policies and practices involving the use of estimates and judgments that are critical to determining Canyon's financial results.

Key Sources of Estimation Uncertainty

The following are key estimates and their assumptions made by management affecting the measurement of balances and transactions in the Consolidated Financial Statements.

Revenue Recognition

The Company recognizes revenue based on the completion of planned programs of services and adjusted for required changes as agreed by the customer. For Pressure Pumping Services, revenue is recognized as work is completed and agreed upon by the customer. For Fluid Management Services, revenue is recognized based on equipment and manpower usage by the customer.

Estimates of Collectability of Accounts Receivable

The Company's management regularly reviews outstanding accounts receivable and follows up with customers when settlement has not occurred on a timely basis. A provision for doubtful accounts of \$0.7 million has been established as at March 31, 2016 (December 31, 2015: \$0.1 million) based on management's assessment of the Company's accounts receivable collection history. This assessment of collectability involves significant judgment and frequently involves material dollar amounts. As such, the Company's operating results could be affected if bad debts in excess of the allowance are actually experienced.

Depreciation of Property and Equipment

Depreciation is calculated using varying methods and is intended to reflect the historical value of the underlying component that is consumed in conducting each period's operations. Estimates affecting management's assessment of the most appropriate depreciation rate and method of calculation for any particular asset component include the productive life of the asset, its salvage value, equipment utilization rates, planned maintenance programs and technological change.

Revisions to accounting estimates are recognized in the period in which estimates are revised and in any future periods affected.

Management believes that its assessment and choice of estimates used in calculating depreciation are reasonable; however, there is no certainty that the depreciation expense provided will correctly measure the actual reduction in value of asset components used in operations over time.

Non-Financial Assets

Where impairment indicators exist, the recoverable amount of the asset or cash-generating unit ("CGU") is determined using the greater of fair value less costs of disposal or value-in-use. Value-in-use calculations require assumptions for discount rates and estimations of the timing for events or circumstances that will affect future cash flows. Fair value less costs of disposal requires management to make estimates of fair value using market conditions for similar assets as well as estimations for costs of disposal, taking into account dismantling and transportation costs.

Every reporting period, management assesses the carrying value of non-financial assets for indications of impairment. When an indication of impairment is present, an impairment test is performed and if required, the asset is written down to its estimated recoverable amount. No indications of impairment existed in the quarter ended March 31, 2016. As at December 31, 2015, a mandatory impairment test was performed per IAS 36, Impairment of Assets, and the Company recorded a goodwill impairment of \$28.4 million and an impairment loss of \$1.2 million on specific equipment that was partially constructed but not completed. The Company had no further plans to complete fabrication on the equipment.

The assessment of impairment indicators is subjective and considers the various internal and external factors such as the financial performance of individual CGUs, market capitalization and industry trends. In addition, the impairment assessment is impacted by how management determines the composition of CGUs. Management has grouped assets into CGUs based on several factors with a primary focus on assets whose cash flows are interdependent. This assessment is subject to management estimate and interpretation.

Tax Positions

The Company is subject to income and commodity taxes. Judgment is required in determining provisions for taxation. There are many transactions and calculations for determination of the various tax assets and liabilities. The Company maintains provisions for tax assets and liabilities. These provisions are made using the best estimate of the amount expected to be paid based on a qualitative assessment of all relevant factors. The Company reviews the adequacy of these provisions at the end of the reporting period. However, the Company is subject to ongoing audits, and it is possible that at some future date an additional liability could result from audits by taxing authorities. Where the final outcome of these matters is different from the amounts that were initially recorded, such differences will be recognized in the consolidated financial statements in the period in which such determination is made.

Share-Based Payments

The Company's estimate of share-based payment compensation is dependent upon estimates of historic volatility and forfeiture rates.

Critical Judgments in Applying Accounting Policies

The following are critical judgements that management has made in the process of applying accounting policies and that have the most significant effect on the amounts recognized in the consolidated financial statements.

Non-Financial Assets

The Company's assets are aggregated into cash-generating units for the purpose of calculating impairment. CGUs are based on management's judgments and assessment of the CGU's ability to generate independent cash inflows. Judgments are also required to assess when impairment indicators exist and impairment testing is required.

Provisions and Contingencies

The Company is required to exercise judgment in assessing whether the criterion for recognition of a provision or a contingency has been met. The Company considers whether a present obligation exists, probability of loss and can a reliable estimate be formulated.

RISK FACTORS AND RISK MANAGEMENT

Readers of the Company's interim report should carefully consider the risks described under the heading "Risk Factors" in the Company's most recently filed AIF, which are specifically incorporated by reference herein. The AIF is available on SEDAR at www.sedar.com. Other than risks described within this MD&A, including within this section, the Company's risk factors and management of those risks has not changed substantially from the most recently filed AIF.

Credit Risk and Dependence on Major Customers

The Company's accounts receivable are due from customers that operate in the oil and gas exploration and production industry, and are subject to typical industry credit risks that include oil and natural gas price fluctuations and the customers' ability to secure appropriate financing. The Company assesses the credit worthiness of its customers, and monitors accounts receivable outstanding on a regular, ongoing basis.

The Company has a customer base of more than 60 exploration and production entities, ranging from large multinational public entities to small private companies. Notwithstanding the Company's significant customer base, five customers accounted for more than 57% of revenue in the first quarter of 2016 (year ended December 31, 2015: five customers, 49% of revenue).

Standard payment terms for the industry are 30-60 days from the invoice date, however industry practice allows payment for up to 90 days after the invoice date.

CONTROLS AND PROCEDURES

Disclosure Controls and Procedures

Canyon's Chief Executive Officer and Chief Financial Officer have designed, or caused to be designed under their supervision, disclosure controls and procedures to provide reasonable assurance that: (i) material information relating to the Company is made known to Canyon's Chief Executive Officer and Chief Financial Officer by others, particularly during the period in which the annual and interim filings are being prepared; and (ii) information required to be disclosed by the Company in its annual filings, interim filings or other reports filed or submitted by it under securities legislation is recorded, processed, summarized and reported within the time period specified in securities legislation. Such officers have evaluated, or caused to be evaluated under their supervision, the effectiveness of Canyon's disclosure controls and procedures at the financial year end of the Company and have concluded that the Company's disclosure controls and procedures are effective at the financial year end of the Company for the foregoing purposes.

Internal Controls over Financial Reporting

Canyon's Chief Executive Officer and Chief Financial Officer have designed or caused to be designed under their supervision, internal controls over financial reporting to provide reasonable assurance regarding the reliability of the Company's financial reporting and the preparation of financial statements for external purposes in accordance with

generally accepted accounting principles applicable to the Company. Such officers have evaluated, or caused to be evaluated under their supervision, the effectiveness of Canyon's internal controls over financial reporting at the financial year end of the Company and have concluded that Canyon's internal controls over financial reporting are effective at the financial year end of the Company for the foregoing purposes.

No material changes in the Company's internal controls over financial reporting were identified during the period beginning on January 1, 2016 and ended on March 31, 2016, that have materially affected, or are reasonably likely to materially affect, the Company's internal controls over financial reporting. It should be noted that a control system, including the Company's disclosure and internal controls and procedures, no matter how well conceived, can provide only reasonable, but not absolute, assurance that the objectives of the control system will be met and it should not be expected that the disclosure and internal controls and procedures will prevent all errors or fraud.

NON-GAAP MEASURES

The Company's Consolidated Financial Statements have been prepared in accordance with IFRS. Certain measures in this document do not have any standardized meaning as prescribed by IFRS and are considered Non-GAAP Measures.

Adjusted EBITDA, funds from operations, adjusted income (loss) and comprehensive income (loss) and adjusted per share amounts are not recognized measures under IFRS. Management believes that in addition to income (loss) and comprehensive income (loss), the following measures are useful to help assess the results of the Company.

Descriptions and reconciliations of these Non-GAAP Measures to the most directly comparable IFRS measures are outlined below. Readers should be cautioned that the below metrics should not be construed as an alternative to or a more meaningful measure than those determined in accordance with IFRS. Canyon's method of calculating these metrics may differ from other companies and accordingly, they may not be comparable to measures used by other companies.

Adjusted EBITDA

Canyon calculates adjusted EBITDA as loss and comprehensive loss for the period adjusted for depreciation and amortization, equity settled share-based payment transactions, gain or loss on sale of property and equipment, finance costs, foreign exchange loss, income tax (recovery) expense, and impairment.

Adjusted EBITDA is a useful supplemental measure as it provides an indication of the cash results generated by the Company's principal business activities prior to consideration of how those activities are financed and how the results are taxed.

| 000's (Unaudited) | Three Months Ended | |
|---|--------------------|-----------------|
| | March 31, | |
| | 2016 | 2015 |
| Loss and comprehensive loss | (\$20,594) | (\$1,038) |
| Add (deduct): | | |
| Depreciation and amortization | 15,114 | 15,836 |
| Finance costs | 589 | 533 |
| Foreign exchange loss | 565 | 1,564 |
| Share-based payment transactions | 4,860 | 1,371 |
| (Gain) loss on sale of property and equipment | (167) | 49 |
| Write-off of equipment and onerous contract | 1,187 | - |
| Income tax expense (recovery) | (5,227) | 20 |
| Adjusted EBITDA | (\$3,673) | \$18,335 |

Funds from Operations

Funds from operations refers to cash flow from operations before changes in non-cash working capital, income taxes recovered (paid), but includes finance costs and current tax recovery (expense).

Funds from operations is a measure of liquidity based on cash generated by the Company's activities without consideration of the timing of the monetization of non-cash working capital items or payment of taxes. Management believes that funds from operations provides investors with an indication of cash available for capital commitments, debt repayments, payment of taxes, and other expenditures.

| 000's (Unaudited) | Three Months Ended March 31, | |
|--|---------------------------------|-----------|
| | 2016 | 2015 |
| Net cash (used in) from operating activities | \$5,342 | (\$8,320) |
| Add (deduct): | | |
| Income tax paid (recovered) | (675) | 8,827 |
| Change in non-cash working capital related to operating activities | (8,679) | 16,188 |
| Current tax recovery (expense) | 5,010 | (578) |
| Finance costs | (589) | (533) |
| Funds from operations | \$409 | \$15,584 |

Adjusted Income (Loss) and Comprehensive Income (Loss)

Adjusted income (loss) and comprehensive income (loss) is calculated as income (loss) and comprehensive income (loss) plus amortization expense on intangibles, impairment expense and share-based payment transactions.

Adjusted per share basic and diluted earnings (loss) per share are calculated as adjusted income (loss) and comprehensive income (loss) divided by weighted average basic and diluted shares outstanding.

These measures provide investors with results generated by the Company's business activities in the normal course of business, not taking into account share-based payments expense, one-time items or amortization of intangibles or impairment which are not reflective of past operational activity.

| 000's (Unaudited) | Three Months Ended March 31, | |
|--|---------------------------------|-----------|
| | 2016 | 2015 |
| Loss and comprehensive loss | (\$20,594) | (\$1,038) |
| Amortization expense on intangibles | 1,447 | 1,505 |
| Write-off of equipment and onerous contract | 1,187 | - |
| Share-based payment transactions | 4,860 | 1,371 |
| Adjusted income (loss) and comprehensive income (loss) | (\$13,100) | \$1,838 |
| Adjusted per share-basic | (\$0.19) | \$0.03 |
| Adjusted per share-diluted | (\$0.19) | \$0.03 |

FORWARD-LOOKING STATEMENTS

This document contains certain forward-looking information and statements within the meaning of applicable securities laws. The use of any of the words "expect", "anticipate", "continue", "estimate", "objective", "ongoing", "may", "will", "should", "believe", "plans" and similar expressions are intended to identify forward-looking information or statements. In particular, but without limiting the foregoing, this document contains forward-looking information and statements pertaining to the following: future oil and natural gas prices; future results from operations; future liquidity and financial capacity and financial resources; future costs, expenses and royalty rates; future interest costs; future capital expenditures; future capital structure and expansion; the making and timing of future regulatory filings; and the Company's ongoing relationship with major customers.

The forward-looking information and statements contained in this document reflect several material factors and expectations and assumptions of the Company including, without limitation: the expected timing the Company will

experience negative adjusted EBITDA; that we are better positioned than our competitors to manage financial losses; that bundled services will provide more efficient operations; our primary objectives, and methods of achieving those objectives; the general continuance of current or, where applicable, assumed industry conditions; the continuance of existing tax, royalty and regulatory regimes; certain commodity price and other cost assumptions; the continued availability of adequate debt and/or equity financing and cash flow to funds its capital and operating requirements as needed; and the extent of its liabilities. The Company believes the material factors, expectations and assumptions reflected in the forward-looking information and statements are reasonable but no assurance can be given that these factors, expectations and assumptions will prove to be correct.

The forward-looking information and statements included in this document are not guarantees of future performance and should not be unduly relied upon. Such information and statements involve known and unknown risks, uncertainties and other factors that may cause actual results or events to differ materially from those anticipated in such forward-looking information or statements including, without limitation: changes in commodity prices; changes in the demand for or supply of the Company's services; unanticipated operating results; changes in tax or environmental laws, royalty rates or other regulatory matters; changes in the development plans of third parties; increased debt levels or debt service requirements; limited, unfavorable or a lack of access to capital markets; increased costs; a lack of adequate insurance coverage; the impact of competitors; reliance on industry partners; attracting and retaining skilled personnel and certain other risks detailed from time to time in the Company's public disclosure documents (including, without limitation, those risks identified in this document and the Company's Annual Information Form).

The forward-looking information and statements contained in this document speak only as of the date of the document, and none of the Company or its subsidiaries assumes any obligation to publicly update or revise them to reflect new events or circumstances, except as may be required pursuant to applicable laws.
